2009 REPORT TO OUR COMMUNITY

www.childguidancecenter.org

soaring high with our programs

Outpatient Services

At the core of Child Guidance Center's programs is outpatient counseling. Outpatient counseling consists of individual and family therapy, group therapy, and parental support. This service is available to all children, adolescents, and families who meet clinical criteria. Child Guidance Center operates four outpatient offices located conveniently throughout Jacksonville and a fifth outpatient office located in Baker County at our Macclenny office.

Case Management Services

Targeted Case Managers work with the child and family to link them with needed community services, while monitoring and evaluating the services they are receiving. Case Managers act as advocates for the child and family.

Community Family Services

Community therapists provide in-home and on-site therapeutic services to children, adolescents and their families, including children in foster care, who are having serious emotional problems.

Family Services Planning Team (FSPT)

This team, chaired by Child Guidance Center staff, consists of a group of representatives from various agencies who collaboratively are responsible for coordinating community-based support services for children who are at risk of losing their current home placement due to behaviors attributed to emotional disturbance.

Fetal Alcohol Spectrum Disorder (FASD) Program

The FASD Program is funded by a grant from Substance Abuse Mental Health Services Administration (SAMHSA). The Program provides diagnosis, evaluation, and some intervention services, when necessary, to children who receive other services from Child Guidance Center. The children are evaluated by a Licensed Clinical Social Worker, a Psychologist, an Occupational Therapist, a Speech Pathologist, as needed, and a Geneticist.

Full Service School Counseling

Counseling is provided at seven high schools and their feeder schools located across Duval County. Individual, family and group sessions are provided. This program empowers family members to become actively involved in their child's education and healthy emotional development.

High Risk Newborn Program

The Program serves families with children under 2 who are at risk of abuse or neglect. The services provided include dyadic therapy with the primary caretaker and the child, family therapy, individual therapy, play therapy and case management. The specific services are determined by the family's needs. Services are delivered in the home setting.

Psychiatric Services

Psychiatric services can be accessed through all programs at Child Guidance Center. Clients are provided the following services: Psychiatric Evaluation, Team Treatment Planning, and Medication Management.

Rapid Response Program

The Team's objective is to reduce the number of children hospitalized through the Baker Act and to ensure follow-up services are provided to the child after the crisis intervention episode. Referrals are accepted from Duval County Public Schools and from Foster Care Hot Lines.

School-Based Counseling Programs

In-school counseling and educational services are provided to students assigned to the Excel/EBD Program in seven Duval County Public Schools.

Supervised Visitation/Parent Education

Parent Education offers the Nurturing Parenting Program for parents who have a case plan that requires parent education. Supervised Visitation is provided for families whose children are in out-of-home placements, such as foster care, and in need of supervision during visitation to assure child safety.

Case Management and Outpatient Counseling are Nationally Accredited through CARF (Commission on Accreditation of Rehabilitation Facilities).
